

Paving Update 6.1.11

PHASE III PUNCHLIST

The Phase III Punch list is underway. The contractor has replaced sections of failed asphalt on Kaloli Drive under the supervision of our Engineer and General Manager. Sections of Maku'u, Paradise and Kaloli Drive will be coated with a pavement treatment. This treatment will fill in any inconsistencies in the wear-course and insure a longer lasting pavement. All remediation regarding the punch list are at no additional cost to the Association.

PHASE IV PAVING CONTRACT

This phase of the paving will consist of between 8.5 and 10 miles of base installation and asphalt on chosen Avenues. The roads to be paved will be in the upper park. Once the bid has been awarded the roads to be paved will be announced.
